SUBJECT

Scheme for the water supply to Arasikere town

Note 6407-12 of 17 & 32 To Chief Engineer, Director of PH, Comm'r, Director of Health, Sanitary Engineer DC Hassan District

Sanction is issued estimate for the Scheme at a Cost of Rs 24960

Sir,—

Serial No	
1	Letter No C-170-31 Dy 13.12.31 D.C Hambantota submits for sanction 3 estimates aggregating Rs 21,550 for a project for providing pipe water by Bore wells to Arsikere Town & requests suitable grant-in-aid for the Scheme. The details of the project are given in the P.O & consists of supplying water to the town from two bore wells yielding each 1500 gallons per hour which have already been sunk & tested. The estimates are said to have been prepared by Executive with the Sanitary Engineer & the Director of Industries. 2 The Municipal Council have also approved of the project & have agreed to deposit Rs 15,000 in the S.B towards the cost of the scheme immediately & to bear the excess if the cost in any year

WD 02553— 0 0—GPB—8 0

can procure to pay half the cost during the next two years In view of the heavy expenditure they will have to meet, the MC Committee requests that the rule regarding the excess balance may be relaxed The Dy Comm recommends that both the Lawyers of the MC may be sanctioned & that for the present no objection if the MC is assured that preference will be given to them in distributing the Govt grants during the next succeeding years

3 The Dy Comm to whom the relaxation of the minimum balance is required has not been accepted this will have to be ascertained & the Committee consulted afterwards Re the grants (from Govt) the Collector says he will have to be consulted cause the amount is to be given out of the Water Supply grant If it is to be given out of Town Improvement Grant the amount

Rule no 20 Mal Account Manual requires that 25 p c of the annual income shall be kept as closing balance in the case of Town M.

Serial No

to be allotted for this Municipality will depend upon the total amount of the grant that Govt may be able to sanction during the next & succeeding years as also upon the other urgent demands upon the grant.

5 As regards the finances of the Municipality from the budget sanctioned for 1931-2 that the normal income and expenditure is Rs 44127 and Rs 40394 respectively and the closing balance Rs 7101 The Municipality has an investment of Rs 16729 of which they have been allowed to withdraw Rs 10000 for improvement works It is not therefore possible for the Municipality to deposit Rs 15000 towards the cost of the water works unless they give up the improvement works for which the Municipality Scheme is now expected to be

NOTE ON ARSIKERE WATER SUPPLY

The scheme is for the supply of water by pumping from two bore holes sunk in the Town and it is estimated to cost Rs 21 550/ (Please see 1 140 31 put up below)

2 The Municipal Council request that Government may promise to contribute one half of the cost in the next two year There is no amount available out of the provision in the current year's budget for making any further grants to Municipalities

3 The Deputy Commissioner has reported that the Municipal Council are prepared to meet the entire cost of the scheme in the first instance and utilise a sum of Rs 15 000/ invested in the Savings Bank for this purpose If this is done the Municipal Council will have to desist from withdrawing Rs 10 000/ for carrying out certain improvement works as approved in the Government Order sanctioning the Budget of the Municipality (Please see 1 242 30 6)

Flag

4 The balance at the credit of the Municipality is expected to be Rs 7 101/ on 0 0 1931 2 and if the improvement works are also to be or have been carried out the total amount available will be only about Rs 12 000/ including the minimum balance of Rs 6 00 / to be kept up under the rules

Arsikere Water Supply (13)

App F III—2]

General and Revenue Secretariat | File No 140 of 1931

Serial No

33) Letter dated 7th March 1932 from Mr Mieldazis returning the estimates relating to the Arsikere Water Supply

34) The estimate as revised by Mr Mieldazis is for Rs 24 900 as against Rs 21 550 according to the original proposals received from the Deputy Commissioner The excess is due to the fact that while according to the original scheme pumping was to be only from one bore hole the present intention is to use two bore holes The new proposal is certainly more satisfactory I think the scheme may be sanctioned subject to the condition that the usual Government grant of half the cost will not be payable immediately but will be given in the years 1933 34 and 1934-35 if funds are available

35) The Municipal Council had in January a balance of Rs 17 707 in Saving Bank deposit and Rs 5 339 in current account in the Treasury The anticipate at the end of the year 1931-32 a further surplus of Rs 6 242 after meeting their current expenses If this anticipation is realised the Council can easily spare Rs 25 000 required for putting the scheme through

36) For the maintenance of the scheme the estimate is Rs 2,400 per annum The Municipal Council should not find any difficulty in meeting this also since the normal income exceeds the normal expenditure by over Rs 3 500 and possibly they will also impose a water rate

SIR

In forwarding herewith for favour of sanction 3 estimates aggregating to Rs 21,550/- relating to the project for providing pipe water by Bore wells to the Arsikere Town Municipality, have the honor to state as follows -

2 The need for drinking water being very keenly felt, the Municipal Council decided to provide the town with pipe water from bore-wells Accordingly two bore wells were sunk successfully each yielding at least 1500 gallons per hour The Industrial Engineer of the Well boring section of the Department of Industries and Commerce having opined that it is quite possible to provide the whole town with water from these two bore-wells, the Sanitary Engineer of the Bureau of Sanitary Engineering, was addressed to prepare and furnish the necessary estimates, which he has furnished accordingly The estimates sent are as follows -

I Estimate sent by the Sanitary Engineer

1	Laying and jointing the 4' C I Rising main for -	Rs 4,650/
2	Erecting a pressed steel tank on Masonry structure	Rs 3 500/- and
3	Laying and jointing the distributing System	Ps 7,705/-
4	Contingencies	Rs 795/
		Ps 16,650/

II Estimate sent by the Director of Industries and Commerce for the pumping installation

1	wo 6 to 8 H P Crude Oil Engines Rs 1000/- each	Rs 2,000/-
2	Two deep well pumps @ R650/- each	Rs 1,300/-
3	Pipe road &c , for the bore wells @ Rs 200/- each	Rs 400/-
4	Power house Rs 300/- each	Rs 600/-
5	Foundation, erection, belting &c , Rs 300/- each	Rs 600/-
	II Total	Rs 4900/-
	Grand Total	Rs 21550/-

The matter was carefully considered by the Municipal Council at their Special meeting held on 6-12-31 at which I was present by request They have unanimously resolved to undertake the whole scheme immediately so as to provide the whole town with water before the ensuing Summer As regards financing the project they have ear-marked and deposited a sum of Rs 15000/- in the Savings Bank and they are at present prepared to bear the entire cost provided Government assure them that they (Govt will give a moiety of the total cost of the scheme as a contribution in the next two years) They further state that in case no grant can be made by Government during the current year, they are prepared to carry out the entire work with the help of their reserve balances But at the same time they want the rule regarding the minimum working balance to be relaxed In this connection, I beg to invite kind reference to my letter No C 1057 30 dated 14-11-31, recommending that in view of the fact that the Municipal Council have so far very liberally spent a sum of Rs 40,000/- on Public Improvement Works without contribution from Government, a sum of at least Rs3000/- may be given by Government as a grant, but this has not been sanctioned as communicated in your letter No L 4072 1 71-31 14 dated 2-12 31 As the Municipal Council have been spending money on utilitarian objects wisely and freely they very richly deserve a substantial subsidy from the Government I therefore recommend that a promise may be given to the Municipal Council that a moiety of the cost will be given to the Municipality as early as practicable and within the next two years if po sible as a grant by the Government to enable them to put the work on hand immediately

This promise will satisfy the Municipal Council

The relaxation regarding the minimum working balance prayed for by the Municipal Council may also be kindly sanctionedx

3 I request the favour of early sanction to the estimates sen as also to the work being carried out as proposed by the Council Copy of the proceedings of the Special Meeting of the Municipal Council on the subject held on 6-12-31 together with the connected papers is also enclosed for reference

4 Government are I think, fully aware of the great scarcity of water in the Arsikere Town As the Municipal Council have resolved upon incurring the entire expenditure themselves during the current year I would strongly recommend that the scheme be sanctioned immediately and the Municipal Council giventhe assurance that as they have agreed to spend the full amount they will be given preference in distributing grants during the next and succeeding years for water works As their needs is x great, they must be I think given special treatment

I have the honour to be

Sir

Your most obedient servant

DEPUTY COMMISSIONER

HASSAN DISTRICT

ABSENT - 5

1 Communication from the Deputy Commissioner Hassan District in his No C 170-31 dated 27th November 1931 regarding the water supply scheme for this town The Deputy Commissioner Mr G B Heblikar B A LL B who was present on request explained the scheme

(a) As it is reported by the Industrial Department that both the Bore-wells sunk in the Arsikere Town are very success ful it is resolved that the whole water supply scheme be taken on hand forthwith and completed as early as possible

(b) That two more wells at the sites already selected be also taken on hand and completed

(c) That the Government be requested to make a grant of half the total cost the other half being met out of the Municipal Funds

(d) That the work of laying of pipes and of putting of the machinery be entrusted respectively to the Sanitary Department and the Industrial Department in the same way as in Tiptur Municipality

(e) That as the water scarcity is very great in Arsikere Town the Municipality is prepared to incure the whole expenditure immediately provided a promise is made by the Government that their share of cost will be paid to the Municipality in the next two years

(f) That in thecase the Government contribution is not forthcoming in the current year the rule regarding the minimum working balance be relaxed

(g) That as the Municipality has spent large sums of money for which the Government have not paid their full quota i e half the cost thereof and as the water scarcity at Arsikere is extremely great the Municipal Council trust that the Government will sanction the water supply scheme immediately with their quota and direct the departments concerned to see that water is made available during the coming Summer

==========

C O P Y

G B Heblikar
Deputy Commissioner
Hassan District

I S D

A note on the Water Supply Scheme to Arasikere town furnished with reference to the request of the Deputy Commissioner, Hassan, to give the cost of the Power Installation required to give water from a tank situated at a higher level than the present Bore-well site at a distance of about 1,100 ft

---

The present proposal is to take up the entire scheme in two instalments and enable at least one half of the town (almost immediately) to get about 15,000 gallons of water a day for distribution It is proposed that after the second bore-hole is completed, found successful, and found to yield about 15,000 gallons per day, the distribution for the other half of the town may be taken up as a separate proposition, taking care that the scheme of distribution will fit in with the first already described above It is seen from the file with the Deputy Commissioner that the total cost, inclusive of the tank, for the first stage of distribution is Rs 5210/-

The following is an estimate of the ~~It is required to give~~ the cost of the Power Installation necessary for lifting 15,000 gallons per day to a tank situated at a distance of about 1100 ft from the bore-hole, wherefrom distribution for the first half of the town may be provided ~~The cost is as follows:-~~

Engine 6to8 H P to run on Crude Oil	Rs	1000/-
Pump 1500 gal an hour capacity Deep Well Plunger Type	Rs	600/-
Pipe, rod and couplings for the bore-well	Rs	200/-
Small zinc sheet shed for the power house	Rs	300/-
Foundation, erection, belting, etc ,	Rs	300/-
Total	Rs	2450/-

~~It is seen from~~ According to the estimate given by the Sanitary Engineer, that Rs 5210/- ~~represent~~ (the provision covers) the cost of laying of 4 cast iron pipe for the rising main distribution towards that half of the town which it can command, and the cost of the tank Therefore the total cost of the first stage of the Water Supply Scheme will be Rs 2450/- + Rs Rs 5210 i e Rs 7660/-

After the second bore-hole is completed and the qu
water avaiable from it is determined , the full scheme can
given effect to It will be found that the scheme suggested
is really the first stage of
~~can be fitted into~~ the full scheme, and is capable
of being given effect to at once

Dear Mr Ranga Rao

Please refer to my letter No C 170-31 dated 18-1-1932 forwarding for sanction four estimates amounting to Rs 21 550/- for providing pipe water to the Arsikere Town As the Municipal Council are very anxious to have the water supply during the ensuing Summer when the scarcity of water will be very keenly felt I request you to obtain as early as possible the sanction of Government to the project As stated in my letter and the Municipal Resolution the Municipal Council have the full funds in readiness

Yours sincerely

GB Hebbalkar

General Secretary to Government,
Bangalore

SIR

With reference to our letter No L 4665/ 1 140 31 2 dated 12th December 1931 calling for certain information regarding the Water Supply project of the Arsikere Town, I have the honor to enclose herein copy of the proceedings of the Special Meeting of the Municipal Council held on 9th January 1932 at which I was also present by invitation It will be seen therefrom that the Municipal Council have at their credit Rs 17,707/ in the S B Deposit and 5339/ in current account with the Treasury They further expect at the end of the year a further surplus of Rs 6244/ after meeting all their current expenses (optional and ordinary) for the year On the whole they expect to have a surplus of nearly Rs 30 000/ at the end of the year They will find it possible to spend Rs 21,500/- out of Rs 30,000/ ,for completing the project They are prepared to spend this amount this year if the Government promise to reimburse them to the extent of a moiety of the cost eventually at the earliest opportunity

The other improvements work referred to in our letter under reference for which a sum of Rs 10 000/ was proposed, will not be taken up this year as the Governm nt are not prepared to sanction their quota for same

In these

In these circumstances I am of opinion that the financial condition of the municipality warrants the undertaking of the project immediately, particularly in view of the fact that there is great scarcity of water in Arsikere and wells have already begun to dry up this year

2 I therefore request you to obtain early sanction of Government to the proposals sent up with my letter dated 13th December 1931 the plans and estimates are resubmitted herewith

I have the honor to be,
Sir,
Your most obedient servant,

Deputy Commissioner,
Hassan District

Special meeting proceedings of the Arsikere Town Municipality held on 9th January 1932 at 4 P M in the Municipal Office

Present 16 Absent 2

I Communication from the Deputy Commissioner, Has an District forwarding letter No L 4665/M1 140 31 2 dated 28 12 1931 from the General Secretary to Government calling for certain information

Resolution

The normal income of the Municipality exceeds the normal expenditure by a very substantial amount and that is why the Municipal Council resolved upon withdrawing a sum of Rs 10,000/ from the Savings Bank Account, under the impression that the Government will contribute an equal amount for effecting improvements in the town But as the Council have been informed that no grant can be made this year they do not contemplate to withdraw this amount for any work other than the water supply scheme which is estimated to cost 21650

The Budget of normal income of the Municipality is Rs 25817, and the amount yet to be collected under this head during the latter half of the year 31 32 is Rs 13892 The amount of expenditure normal and optional to be incurred during the same period amounts to Rs 7548 Thus the receipts will exceed the expenditure by Rs6244

The Municipal Council have at their credit in the Savings Bank account a sum of Rs 17707 1 4 and interest thereon They have also a sum of Rs 5338 10 6 at their credit in the Taluk Treasury They have thus at their credit a sum of 23145 11 10 This will be increased to nearly 30,000 at the end of June 1932 in the normal course It is under the e circumstances that the Municipal Council resolve to carry out the entire water supply scheme, which is at present estimated to cost 21650, during the current year, provided the Government promise to pay their quota viz a moiety of the total final estimate of the entire scheme, at the earliest possible opportunity i e a soon a the Government are in a position to make

In th se circum tances I am of opinion that the financial condition of the unicipality warrants the undertaking of the project immediately, part cularly in view o the fact that there is gr at scarcity of wat r in Arsik re and wells have already begun to dry up this year

2 I therefore request you to obtain early sanction of Government to the propo als sent up with my letter dated 13th December 1931 the plans and estimates are resubmitted herewith

I have the honor to be,
S i r,
Your most obedient servant,

Deputy Commis ioner,
Hassan Di trict

Special meeting proceedings of the Ambikapura Town Municipality held on 9th January 1932 at 4 P M in the Municipal Office

- - -

Present 16 Absent 2

I Communication from the Deputy Commissioner, Has an District forwarding letter No L 4665/M1 140 31 2 dated 28 12-1931 from the General Secretary to Government calling for certain information

Resolution -

The normal income of the municipality exceeds the normal expenditure by a very substantial amount and that is why the municipal Council resolved upon withdrawing a sum of Rs 10,000/ from the Savings Bank Account, under the impression that the Government will contribute an equal amount for effecting improvements in the town But as the Council have been informed that no grant can be made this year they do not contemplate to withdraw this amount for any work other than the water supply scheme which is estimated to cost 21550

The Budget of normal income of the municipality is Rs 25817, and the amount yet to be collected under this head during the latter half of the year 31 32 is Rs 13892 The amount of expenditure normal and optional to be incurred during the same period amounts to Rs 7548 Thus the receipts will exceed the expenditure by Rs6244

The Municipal Council have at their credit in the Savings Bank account a sum of Rs 17707 1 4 and interest thereon They have also a sum of Rs 5338 10 6 at their credit in the Taluk Treasury They have thus at their credit a sum of £3145 11 10 This will be increased to nearly 30,000 at the end of June 1932 in the normal course It is under the circumstances that the Municipal Council resolve to carry out the entire Water Supply scheme, which is at present estimated to cost 21550, during the current year, provided the Government promise to pay their quota viz a moiety of the total final estimate of the entire scheme, at the earliest possible opportunity i e as soon as the Government are in a position to make

grants to the unicipalities and in view of the fact that this unicipal Council will have to ~~expend~~ spend the amount out of their funds to give this unicipality preference over others which have not done so the Council request the Government to pass early orders sanctioning the scheme as water scarcity is being increasingly felt in the town

B g l (S I d) d t d March 7,

Dear Sir

RE ARSIKERE WATER SUPPLY

I have the honor to forward herewith an abstract estimate for water supply to Arsikere t n together with annual estimated maintenance charges for working two bores

Flag A

The original estimate for distribution amounting to Rs 16,650/- prepared by this Bureau provided for water supply from one borewell The second borewell has been completed by the Industries Department and will require only one hundred feet of 4 main to connect it up with the original distribu tion system prepared This will cost Rs 350/- The total cost of the project will then be

1	Two sets of machinery as per estimate of Industrial Engineer	Rs	4,900	0 0
2	Rising Main and distribution system in cluding elevated reservoir as per estimate		16,650	0 0
3	Connecting 2nd borehole		350	0 0
4	Establishment Tools and Plant charges at 18% on items 2 and 3 as item No 1 will be executed by the Industrial Engineer		3 060	0 0
	Grand Total	Rs	24 960	0 0

The annual maintenance charges for working the two present bore wells will be Rs 2 400/ as per enclosed estimate Provision is made therein for one driver on Rs 40/ and an Assistant on Rs 20/ The driver will be in charge of both the plants and during his absence the assistant will look after one of the pumping sets The machinery is proposed to work at ten hours

a day, and the fuel oil and other articles are provided for on this basis The capacity of each pump being 1500 gallons per hour the daily supply will be 30,000 gallons and it is expected that this will meet the daily demand for some time

As regards boreholes No 3 and 4 it has been found that borehole No 3 is not completed and No 4 bore is under contemplation As it is impossible to estimate the yield from these bores they cannot be included in the propo als at the present time

U O file No 121/31 L S G is herewith returned

Sincerely yours,

J. J. Mieldazis

Fair draft

Proceedings of the Government of
H H the Maharaja of Mysore

Read

Letter No C 170 31 dated 15th December 1931 from the Deputy Commissioner Hassan District forwarding for sanction estimates amounting to Rs 21 500/ for providing pipe water by means of bore wells to the Arsikere Town with the resolution of the Arsikere Municipal Council dated 6 12 1931 for the scheme being taken on hand forthwith and completed early the entire expenditure being met out of municipal funds in the first instance and Government contributing their share of one half of the cost of the scheme within the next two years

2 Correspondence ending with letter No C 170 31 dated 18 1 1932 from the Deputy Commissioner Hassan District stating that the Municipal Council xxxx xxxx

28

to provide the whole town with water from 2 bore wells The estimate for Rs 24 960/ as revised by the Sanitary Engineer Rockefeller Foundation provides for pumping water from two such wells Government approve of the revised scheme and are pleased to accord sanction to the estimate for Rs 24 960 The Municipal Council will meet the whole cost from out of their own funds in the first instance and the Government will make a contribution of half the expenditure later in the next two years, subject to availability of funds

2 Government approve also of the proposal of the Municipal Council to relax the rule requiring the maintenance of the minimum balance, provided that it should not be allowed to fall below 12- per cent of the normal income This reduction will be in force up to June 1954

3 The work should be taken on hand forthwith by the Executive Engineer Water Supply Division, and completed as early as possible The Deputy Commissioner Hassan is requested to arrange for the requisite funds being placed at the disposal of the Executive Engineer
